

## The CDL is attentive to the safety, health, and nutritional needs of children.

Breakfast, lunch, and afternoon snack are served according to the guidelines of the Child and Adult Federal Food Program. Meals are served “family style” and parents are invited to join their child for the lunch experience.

We believe that all children and their families should receive high quality care and education regardless of race, culture, ethnicity, socio-economic status, gender, religion or individual and/or family abilities and preferences.

**“A person’s a person,  
no matter how small.”  
Dr. Seuss**

The CDL serves children from six weeks to six years old and offers an afterschool program for children attending grades first through third. The CDL functions under three basic goals: to provide quality education and care to children, present Berea College faculty and students with research opportunities and interaction with young children, and to make available exemplary childcare to all enrolled families.

The CDL has two fenced playgrounds and all entrances have a keypad system and camera.

# Berea College CDL

## Building a love of Education !

The Boyd and Gaynell Fowler Child Development Laboratory (Berea College CDL) is located on West Jefferson Street, between Berea College’s Ecovillage and the City’s Memorial Park.

**Hours of Operation:**

**7:30 AM to 5:30 PM, Monday - Friday.**

**Telephone: 859/985/3620.**

Every spring, the CDL hosts an annual art show with assistance from college students in the Art and CFS departments during NAEYC's Week of the Young Child

The CDL utilizes the many educational resources of Berea College to enhance children's learning experiences.

Our program is designed to consider each child's uniqueness as well as individuality in development and learning styles. As Maslow states, "A musician must make music, an artist must paint, a poet must write, if he (she) is to be ultimately at peace with himself (herself)" We believe all our children have the right and the ability to find this peace.

Children are permitted to manipulate robots created by the students of Berea College's Computer Science Class.

Recycling and care for the environment are also taught at the CDL.

We believe that children who are engaged in hands-on experiences and child-centered curriculum learn more than the child who has only seen pictures.

We show our commitment to quality by participating in Kentucky's Quality Enhancement Initiative STARS for Kids Now as a type 1 STAR 3 program.
