# Current Residence Report for Berea College Graduates

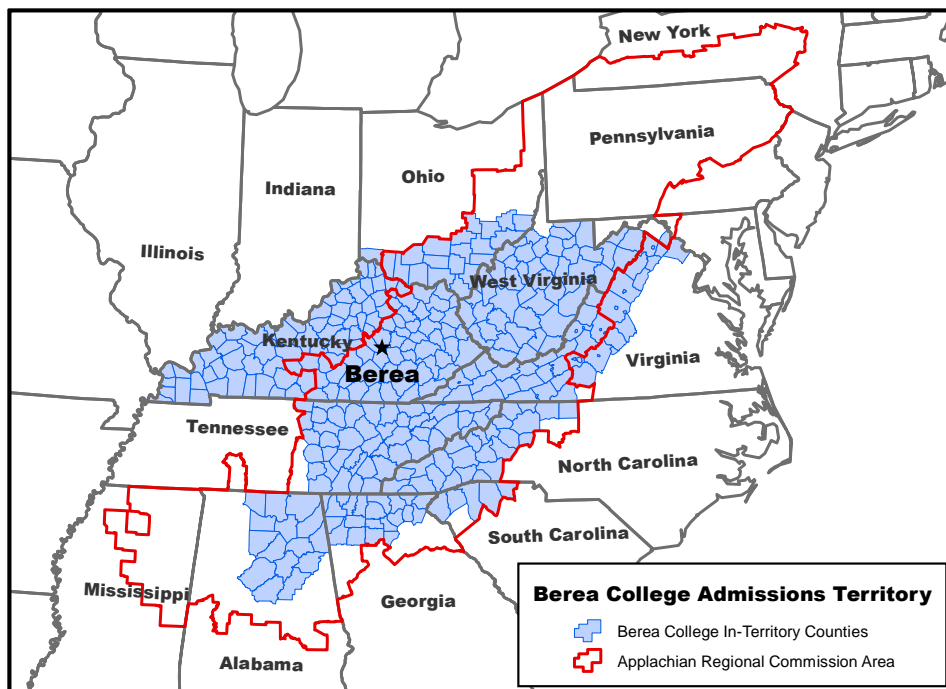

1995-96 through 2004-05 Compared to 2005-06 through 2014-15

**Introduction:** This report is based on two groups; those that graduated between 1996 and 2005 and more recent graduates (2006-2015). We provide information on both decades because length of time after graduation may be related to residency status (e.g. graduate school attendance, initial first job placement, etc.). Residence at entry is determined by the address at the time of admission. Current residency is based on those graduates with a known address. See the table below for more details.

	Number of Graduates	Number who are deceased	Number with no known current address	Total Number of Graduates Included in Report	Percent of graduates on which report is based
1995-96 through 2004-05	2,753	23	278	2,452	89%
2005-06 through 2014-15	3,034	10	203	2,821	93%

The report uses the College's admissions geographical categories. They are:

- *In-Territory:* Students who come from much of the Appalachian region and all of Kentucky within the blue area in the map below. In-Territory also includes permanent residents (a non-citizen who has formally established residency in the United States) and refugees who reside in the territory.
- *Out-of-Territory:* Students who come from outside the In-Territory area, including U.S. Citizens living in foreign countries. Out-of-Territory also includes permanent residents (a non-citizen who has formally established residency in the U.S.) and refugees who reside out of the territory.
- *F-1 International:* Students who are not U.S. Citizens, permanent residents, or refugees, and are attending the college under an F-1 visa issued by the U.S. Department of State.

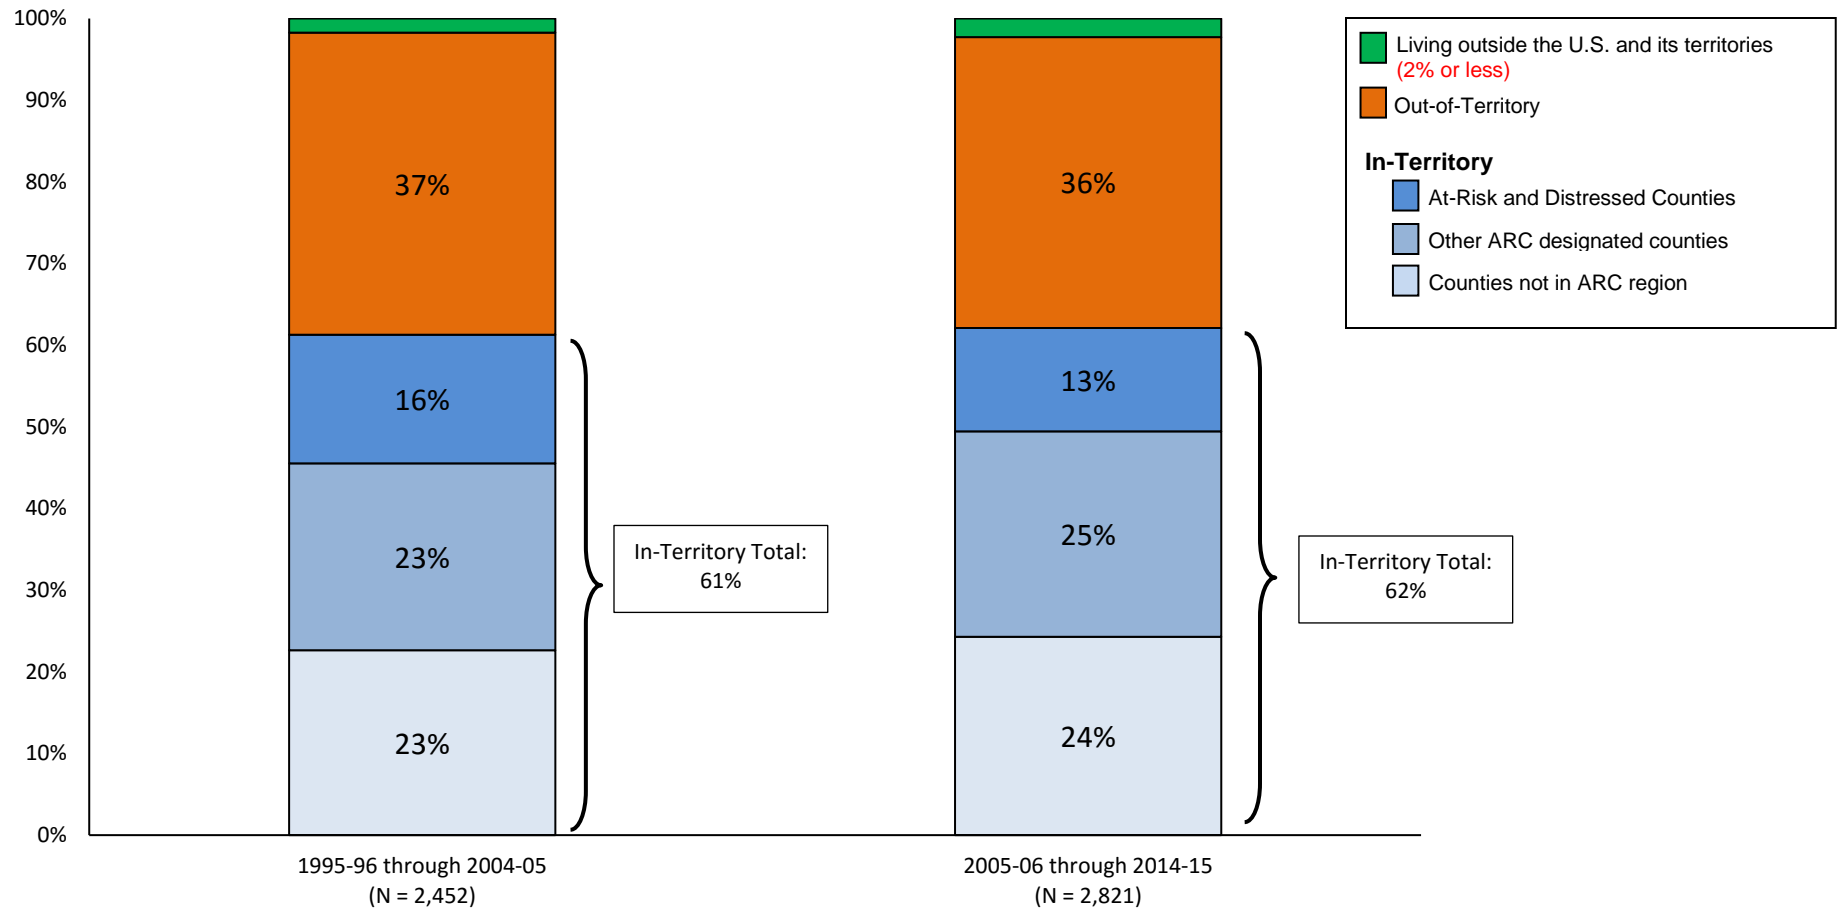

NOTE: The *Appalachian Regional Commission (ARC) Area*, as defined in ARC's authorizing legislation, is a 205,000-square-mile region that follows the spine of the Appalachian Mountains from southern New York to northern Mississippi. It includes all of West Virginia and parts of 12 other states: Alabama, Georgia, Kentucky, Maryland, Mississippi, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, and Virginia. Forty-two percent of the Region's population is rural, compared with 20 percent of the national population. The Region includes 420 counties in 13 states and is home to more than 25 million people.

**Data Summary:** The table below summarizes much of the information contained in the graphs that follow. We find that most graduates (over 60%) still live within the In-Territory region with the largest group in Kentucky. African-American graduates are more likely than Other Domestic graduates to live in the same county as when they were admitted to the College. And, by far, most International graduates live in the United States.
