

I support Berea College's efforts to reduce its campus environmental impacts and implement campus-wide sustainability principles. I will make my contribution by pledging to do the following (please select all that you are willing and able to accomplish):

- Set my computer to go into sleep mode after 5-10 idle minutes.
- Turn my thermostat down to 68 degrees in winter and up to 78 degrees in summer.
- Turn off all lights, computers, and other appliances and equipment when not in use (especially evenings and weekends).
- Replace one incandescent light bulb with a compact fluorescent bulb each month.
- Purchase or request Energy Star certified appliances and office equipment.
- Recycle paper, cans, glass, and batteries.
- Print and photocopy 2-sided documents and use the clean side of discarded paper for printing drafts.
- Purchase paper with post-consumer recycled content.
- Take the stairs instead of the elevator whenever possible.
- Carry a reusable thermal mug for meetings and beverage purchases.
- Leave my car home once a week and carpool or bike to work.
- Shut my fume hood sash every time I leave the hood (lab users only).
- Encourage at least one colleague or classmate to sign the Berea Green Steps Pledge.
- Continue learning about resource conservation by visiting at least one of the following:
 - Ecological Footprint Quiz: <http://www.myfootprint.org>
 - Energy Star: <http://www.energystar.gov/>
 - Union of Concerned Scientists: http://www.ucsusa.org/global_warming/science/
- Other ideas (in your lab, doing laundry, driving, etc.):
